031.	Electric vehicles, despite having some advantages, are not the sustainable solution to current transport needs, as there still are lots of issues connected to this type of transport.	2
032.	Electric car revolution is definitely going to run up against various problems, especially in poor countries, which are unable to provide enough electricity to recharge millions of electric batteries every day.	2
033.	The success of transition to electric vehicles now depends on technologies used in three fields: the batteries' weight, the amount of power that they are able to produce and their recharging speed or exchanging speed.	2
034.	A quantum leap is an essential technology which is needed to help the batteries store more energy and use less space.	2
035.	Despite electric vehicles appearing on the market in many countries, the actual electric vehicle revolution has only just got underway.	информация маленькая 0

<p>The electric car revolution: is it realistic or optimistic?</p>	<p>Количество слов: <u>338</u></p>																									
<p>Nowadays cars are almost the fastest and definitely one of the most comfortable means of transport. At least 50% of world's population has at least one car that belongs to their family members. However, while cars are great for personal use, those which run on petrol and similar substances are harmful to the nature. To reduce damage done by them, it's been suggested to make a transition from cars that run on oil to cars that use electricity or electric cars. However Nevertheless, not many people, as well as scientists, believe that the electric car revolution is possible to happen, and, if possible, then not soon enough.</p>	<table border="1"> <thead> <tr> <th colspan="2" data-bbox="1104 468 1493 539">Критерии оценивания</th> <th data-bbox="1104 539 1493 622">Балл</th> </tr> </thead> <tbody> <tr> <td data-bbox="1104 539 1385 622">Коммуникативная задача (0-10)</td> <td data-bbox="1385 539 1493 622"></td> <td data-bbox="1385 539 1493 622"><u>6</u></td> </tr> <tr> <td data-bbox="1104 622 1385 674">Оформление</td> <td data-bbox="1385 622 1493 674"></td> <td data-bbox="1385 622 1493 674"><u>6</u></td> </tr> <tr> <td data-bbox="1104 674 1385 725">Композиция (0-2)</td> <td data-bbox="1385 674 1493 725"></td> <td data-bbox="1385 674 1493 725"><u>1</u></td> </tr> <tr> <td data-bbox="1104 725 1385 777">Лексика (0-3)</td> <td data-bbox="1385 725 1493 777"></td> <td data-bbox="1385 725 1493 777"><u>2</u></td> </tr> <tr> <td data-bbox="1104 777 1385 828">Грамматика (0-3)</td> <td data-bbox="1385 777 1493 828"></td> <td data-bbox="1385 777 1493 828"><u>2</u></td> </tr> <tr> <td data-bbox="1104 828 1385 880">Орфография и пунктуация (0-2)</td> <td data-bbox="1385 828 1493 880"></td> <td data-bbox="1385 828 1493 880"><u>1</u></td> </tr> <tr> <td data-bbox="1104 880 1385 936">TOTAL SCORE</td> <td data-bbox="1385 880 1493 936"></td> <td data-bbox="1385 880 1493 936"><u>12</u></td> </tr> </tbody> </table>		Критерии оценивания		Балл	Коммуникативная задача (0-10)		<u>6</u>	Оформление		<u>6</u>	Композиция (0-2)		<u>1</u>	Лексика (0-3)		<u>2</u>	Грамматика (0-3)		<u>2</u>	Орфография и пунктуация (0-2)		<u>1</u>	TOTAL SCORE		<u>12</u>

<p>In the text given author claims that the electric car revolution has just got underway, which means that it's still far from its completion, despite some steps have already been made towards it. The same opinion is shared by most governments and factories, which which which realize that electric cars are are not that easy to support: the exchanging and recharging stations need to be built everywhere to fill fill such car's batteries and now not every country has enough resources to do so. Plus electric cars are more expensive to buy and support, and not many people care about ecology enough to spend more on an eco-friendly vehicle.</p>	<p><u>Превышено количество слов.</u></p>																									
<p>Other point of view suggests that electric car revolution is possible if enough effort is put into it. ¹⁷³ However, the supporters of this idea sometimes have rather radical methods in mind, which include increasing increasing the taxes for those who still use the vehicles that run on petrol, which leads to later leads to such cars being completely forbidden by government. honestly, I don't think that this idea is to work out as But such measures are, in my opinion, rather ineffective, which makes the the goal in general sound impossible to achieve.</p>

<p>To sum everything up, I want to say that, despite electric car revolution is, bringing to life an idea of the a perfect future, in our world it's still impossible to be bring it to life as too many resources are to be spent on it, while many countries are stuck in state of poverty and economic crisis. This way, the electric car revolution is nothing but an optimistic view of modern world, which, sadly, has nothing to do will have nothing to do with reality for at least a of couple decades.</p>	Количество слов: 338
