<p>With the development of technology, the electric car revolution has just got underway. In this commentary, I am going to describe it from both ^{believing} positive and ^{sceptical} negative sides and express my opinion on the topic.</p> <p>On the one hand, the electric vehicle revolution can really become true. It already exists. Moreover, it was used in late nineteenth century by New York's taxi company. There was a techno there were battery points at strategic places where drivers could exchange a low battery for fully recharged ones. The electric vehicle would also solve many environmental problems such as air and water pollution.</p> <p>On the other hand, the massive use of electric vehicles demands ^{has} some obstacles conditions. At first, many countries don't have an opportunity to provide enough electricity. The other one is a short ^{lack} of necessary components for electric vehicles to operate. In addition, electric transport will have a really high cost, if any of essential components are in short supply.</p> <p>All in all, both "real" and "sceptical" points of view have their arguments. Personally, I believe that although it might take a lot of time, the electric vehicle revolution will become true sooner or later.</p>	Количество слов: 188
