<p>The first major stepping stone on the path of the English language's present domination was, as per the article, the period between 1603 and 1952, during which the number of native speakers increased tremendously. This feat is attributed to the rise of American exploration and colonization, which saw untold numbers of people flocking to the continent in search of land, freedom, monetary gain, etc. Some of them were only mentioned in passing, others had more light shed on their story. Naturally, such a large amount of dialects and <u>entire</u> languages, coming from the very diverse citizens of the New World colliding and melting together in this linguistic crucible forever changed English itself and gave it a "fresh dimension", though some people would rather call it sacrilege and label a great tragedy. ¹³¹</p> <p>While I do acknowledge that the English language gained a lot during the time period mentioned above, I wouldn't dare call it the first significant development. ²⁶</p>	Количество слов: <u>190</u>

I believe that the transformation from Middle English to Modern is way more significant, as without it the language wouldn't be as easy to learn, as well as much less malleable, making it nigh impossible to achieve the greatness that it did.
